ARM PAIN

I was first introduced to the HTE Products in March 2009 when my friend, Karen invited Elaine, another friend, and me to her home for lunch; and an unexpected surprise of a lifetime happened. My first experience on the SOQI Bed was AWESOME!! I felt totally relaxed and yet highly energized; and all my stress was completely gone. Oh what a wonderful feeling. ABSOLUTELY UNBELIEVABLE!

The most recent pain that I had been coping with for the past few years was in the area of my right arm, around my collar bone and radiating down into my upper arm muscle. Karen suggested that I try the Electro Reflex Energizer. After only about 30 minutes with my feet on the footpads and the electro pads on the pain areas, I felt my severe pain was much relieved. The following morning I was so very amazed because I was able to now lift my right arm over my head again, do windmills with my arm and also comb my hair with absolutely no pain. INCREDIBLE RESULTS!! I have also had sinus problems for many years, unable to breathe through my nose, along with a horrible bad sour taste in my mouth. Karen sent me home with the HotHouse to try and use.

After faithfully using and enjoying the effects of the HotHouse; within one week of much blowing of much nasal secretions, the congestion and bad breathe was completely cleared. I'm so very happy to be able to breathe through my nose again! I truly praise the Lord for such relief!! I was so thankful to Karen for giving us the awesome opportunity to try and utilize these miraculous

HTE devices. My friend, Elaine also was happy to share that she too felt some incredible results! After sharing all my unbelievable experiences of relief with my husband, Oliver; we both immediately knew that we definitely needed and wanted these HTE Home Health Products to use in our home and to share with others. To date we currently have purchased an Advanced ERE, Chi Machine and FirPad. Karen had lent us a HotHouse and E-Power. Utilizing these modalities has now become our lifestyle! I am so delighted to share the results. It has been PHENOMENAL!!

In January of 2009, I was involved in an auto accident, resulting in whiplash; causing more neck and lower back pain. After a long procedure of waiting lists with the insurance company and medical staff; I finally was able to begin weekly physiotherapy treatments. It was around this time that we started using the amazing HTE devices. By persistently utilizing the Advanced ERE, the Chi Machine and the HotHouse, my physiotherapist immediately noticed the change in my neck and lower back after only several treatments. He was interested to know what else I was using other than the weekly exercise program he had prescribed, to bring about the sudden change. Consequently I only needed six treatments and to my amazement my pain was TOTALLY GONE!! I am delighted to be able to share with everyone that for three months now I have been ABSOLUTELY PAIN FREE and have not had to use ABSOLUTELY NO PAIN MEDICATION! To my amazement and joy this is still UNBELIEVABLE!!!

ARTHRITIS

I am a distributor of HTE for over three years. HTE devices have been a revelation to me because through them I found myself, my joy, and especially 'HOPE' to live in good health the last quarter century of my life. Thank you to my friend Louise Gervais who

introduced me to the Chi Machine in February 2007. I was very skeptical at first and not at all prepared to invest money in buying these devices. At this time, I suffered from arthritis in my back and hips. I also suffered from severe knee pain and I was so weak that I was considering buying a wheelchair. After only four sessions of two minutes twice a day on the Chi Machine, I gained back energy in my legs and after 5 days I did not need help getting up in the bath. My first thought was 'I cannot afford to live without the Chi Machine'. I immediately bought a Chi Machine and now I use all devices in the multi-energy concept of HTE once or twice

a day every day. Gradually all the pain in my body has disappeared completely. My health has greatly improved. Blood pressure returned to normal. The leg cramps and pain from arthritis in my back and hips have completely disappeared and the knee pain as well. The SOQI wristband has diminished my pain to 90% from tunnel carpal in my wrist.

I experienced a severe glaucoma attack once again even with the use of a natural eye drop product that I applied in my eyes to prevent a glaucoma attack in the first place. I placed the HotHouse over my eyes during my treatment sessions.

A year later during my routine examination, two specialists have confirmed the complete cure of glaucoma in my eyes to their great surprise! Thank you to Louise Gervais for her help and support to me and my team. Thank you to my team as well because it's all thanks to you and your great work that I promoted to president. It is team work. I love you.

Major Back Injury

God is great! For many years I have suffered from a major back injury. In 2002 I was told there was nothing that could be done for me. You will have to live with the pain, and prepare for a wheel chair. (I refuse to take pain pills)

What a blow that was to hear, as I am by nature a “work-aholic” and was not ready to sit down. My wife Patricia who is a bit of a nut had me try all sorts of natural remedies and seeing all sorts of natural practitioners. She also tried every way possible to detox the body so it could help repair itself but nothing seemed to take away the pain. Sleeping became almost impossible, and it really started to show how bad I was getting. We never stopped praying and in the beginning of 2005 my wife Pat purchased an Advanced ERE, and then a Chi Machine, signing up under (now President) Al Doan who introduced us to the HTE. She then went one step further and MADE me try the Advanced ERE.

I started with 15 minutes twice a day, and before long I was using it 30 minutes twice a day, wide open. By now I was noticing less pain but did not want to say anything because I could not believe foot pounding could help my back. I went to the next step and tried the Chi Machine but it needed a little help so we bought a HotHouse, one was good but two stacked on top of each other was great. Eventually the Chi Machine and I became good friends, thanks to the healing rays of the HotHouse. The better I felt the more I used all the modalities and the more I used them the better I felt. As friends and family noticed the new me they became very interested in what we were doing and that was the start of our life time dream. We both knew that one day we would be working

from home, but helping people at the same time was a bonus. We set up one “SOQI” bed and made one for three grand HotHouses in the basement and we were in business. People never heard of HTE so we opened our doors with a few free treatments so people could experience the SOQI feeling. From there we set the garage up as our “SOQI Home Spa” now using four SOQI beds. I like working with the husband and the wife showing them what would be best for them both. I believe that everyone on earth would benefit using the HTE modalities and that is how I approach everyone coming through our doors. This is where my story became a little harder for me. As I was blessed with the great news of the promotion to president a special young man gave up the fight to cancer. They e-mailed me and asked for my testimony and my mind went blank. So Pat comes to my rescue and spends the day writing my story through her eyes which opened my eyes. This story is the best of us both and in memory of a very special friend. Josh was a supervisor with HTE and we hope to keep his dream alive. My desire is to reach out to the younger generation and teach them about prevention and show them what Josh saw in HTE. Thank you Peter Poon for all the time you spent, doing presentations and educating us, to my fellow HTE members who made it all possible, I give you a special THANK YOU, and of course to HTE for coming to Canada. I use the SOQI bed, Chi Machine, Advanced ERE, and the E-Power for many hours every day to keep going but at least I can keep going. Through the grace of the LORD I can do any thing now that I use to do, it just takes a little longer.

Back Pain

The opportunity to work with the HTE medical devices has given me the chance to help my clients and myself. With these medical devices, I was able to deal with some of the medical issues that I was challenged with. I used the

SOQI bed and the Far Infrared technology to relieve my back pain, sleep better and improve my energy levels. My professional practice, as a medical technologist, has found my clients who have experienced similar issues. By introducing them to the SOQI Bed, the HotHouses, and the Chi machine, I have been able to help them too.

I first got involved in HTE as a distributor using only 1

Chi Machine and 1 HotHouse. I promoted these 2 devices to friends, family, and associates. Later, I soon realized the power of the SOQI Bed, which combines 3 HotHouses, 1 Chi Machine, and I complimented it with a Fir Pad. Today, I explain to others that through the SOQI Bed, you can maximize the benefits of using Far Infrared technology to help your medical conditions.

I recommend scheduling regular appointments and offering demos on the equipments. I also encourage other distributors to do the same thing. Those who choose not to become distributors, enjoy the products for the personal use. But, those who do become distributors, enjoy the products for personal use and enjoy the commission for personal wealth!

Back Pain

The past 20 years have been extremely stressful and depressing. In the past 5 or so years I have had the experience of having doctors refuse to help

me. Add to that the 3 years in Alberta it took me to prove who I was to get health care, after having it for at least 15 years. The results of this and many, many horror stories there put me in a very bad way all around. Before I had started using the Chi Machine I suffered from: **BACK PAIN** - for 20 years I could not lay on my back for more than 2 minutes without feeling excruciating pain.

The pain was in both the upper and lower back. It would irritate me if someone touched my back. I couldn't wear a bra, even clothes touching it would irritate me. It would put me in a bad mood. Doing dishes or walking too far made it unbearable. I would make a wrong move and put my back out easily. I couldn't lift much. At times it would feel like my back was so swollen it would explode. My tailbone was destroyed by childbirth - twice, and I fell down carpeted stairs 3 times, using my tailbone as landing gear. **HIP PAIN** - for 10 years I have not been able to lie on either side for much more than 10 minutes or so without feeling pain. At night I would be lucky to sleep for 2 full hours. I would wake up and my hip would be so painful it would take a long time to go back to sleep, and this was with both hips. Made for a very long night, not being able to lie on my back.

Walking was painful, and if I went far, later I would be in so much pain it would be hard to stand up. This would make my back hurt more. **KNEE, LEGS and FEET** - my ankles have always been on the weak side and I have twisted them many times. I have had 3 bad twists in the past dozen years. The last one left a scar the size of a loonie on the outside of my ankle bone. For at least a dozen years, my feet have been very sore. If I'm not careful how I move them they will lock up. The tops will feel like there are 2 plates grinding on top of each other and I have to find a way to move the foot to relieve it. It is very painful.

A constant feeling of a knife slicing the insole of both my feet. This happens in one spot and never changes place. Sometimes it's more worse than others. I could always feel my feet swell up. My knees built big sore lumps on the back of them. It comes and goes. The inside of my left leg joining my hip has a bump that has come and gone for the past 10 years. I think it's a hernia. When it comes back, I can't stand straight. For at least a dozen years I have not been able to stretch from my hips down without getting a major cramp in my feet and legs, and

sometimes it felt like my back wanted to join. Cramps in my feet would wake me up almost nightly. I'd get cramps in the calves when I walked too much or too hard (up hill).

DEPRESSION - I have been depressed for at least 20 years. The past 15 years I have cried a minimum of twice a day. In the past 5 or so years doctors have given me different pills that I could not tolerate more than a week. My gut would feel like there was a beach ball in it and someone was trying to blow it up. Not very long ago, I was so depressed I was crying constantly. I never went anywhere because I could break into tears so easily and my eyes were always swollen. I was so depressed I couldn't be bothered to do much of anything, including housework. I would have to push myself to do anything. I didn't care much about anything, everything I fought so hard for was lost, and the people who caused it all are still running free. I couldn't think about it without breaking into tears, and I couldn't get it out of my mind.

I am deadly allergic to wasps. Before I escaped Alberta, I considered not using the epi-pen if I got stung again. **CHI MACHINE** - I basically started using it full time twice a day on June 13th, 2012. I had used it off and on for a few minutes a day before that. By June 8th, 2012 my back felt stronger and I think less pain. Although my legs still hurt a lot, the cramps in my feet and legs are noticeably fewer. None have woken me in the night. With my depression, I have only cried 4 times, and not woken once to tears. I have a little more energy I even feel a little better about life.

HOTHOUSE - Beginning of July. **FEELS SOOOOOOO GOOD!!** Each time I use it, I feel better. I feel the pain better too. The pain from old wounds not properly healed. The first 3 days hit every place that I had one time in my life hurt or broken. It is now July 11th, I still have bad pain in the really bad places, but it IS less and even easier to handle. I can breathe better. I CAN sit out in the heat and sun comfortably. I would feel sick before and even come close to passing out after 10 minutes or so. I'm amazed with that one. I've found that certain things can still bring me down, but I can handle it much better. I have much more energy. **POWER EYES** - July 7th, 2012. 15 minutes a day. In Alberta I was diagnosed with borderline glaucoma. I was recently tested in Ont, they said not. I have been wearing glasses for about 30 years. It will be interesting to see the change in my next test. It has been 5 days and there is improvement!! I can tell by the distance I am to my keyboard writing this. I can't wait to never need my glasses to find my glasses ever again!! Thank you Dr. Inoue and everyone involved with this gift. Thank you big brother for introducing me to this amazing....gift.

Major Back Injury

Dear HTE family,

I have a Retail Health Foods Store and Health Practice (Journey of Health) in Calgary. People stopped into my store and tried to tell me about the Chi Machine in 2002 but I was not interested, until

doctors had taken all recovery hope away from my mom, Phyllis Dahl. (She was left in constant pain and in a wheelchair after eight years and ten major surgeries, including Mayo Clinic and hyper baric oxygen therapies, had all failed to get her on her feet after a horse riding injury to her pelvis and back at age 53.)

When she said her 'life was not worth living' I had to agree but could not say that, then I was astonished to hear my voice say 'wait mom, I know of something that might help you' – WHAT? 'Why wouldn't the doctors know of it?' "I don't know but they don't know every thing, I am going to order some equipment from Japan for you' OH NO – NOT THE CHI MACHINE! Now I might injure her more if I try that, I thought. But I did make her a promise, I had better keep it, so I called the distributor and placed an order for a super combo, after inquiring further about the 14-day money back guarantee. She had a hard time starting out but persisted and found that it might be helping, 'there goes my money back guarantee' I thought. After awhile she did not need her pain medications, then she went from wheelchair to crutches to canes to one cane to no cane in 24 months! Her results have brought many people to the HTE family and she now has a beautiful SOQI Home Spa that she enjoys everyday.

Flashing back to 2003, I began to demonstrate the equipment and was amazed at the consistent excellent results. My arthritis went completely away using the equipment, and so have many other problems, please review some of these testimonies at my website; www.journeyofhealth.net. The HTE business has really boosted my professional health results and profits. I also seem to be getting younger each year, halleluia! I offer a premium service called Live Blood Analysis where my research microscope led me into a high-raw diet before I had even heard of this health trend. Four years ago my wife Tonya began teaching Practical and Gourmet Raw Food preparation and nutrition at my store. We are now blessed with a two-year-old daughter and plan to have many more as I start into my fifties. There is a wonderful synergy to healing the body with appropriate food and the HTE Energy Therapy equipment.

Previously, I tried to explain the reasons why the equipment works so well, but now I say that our foods are types of condensed energies, and our bodies can use the HTE equipment's clean energy to help heal our cells directly, in effect bypassing the digestion, but healing the digestion, elimination and all other body functions at the same time! If I had focused more on the HTE business I would have become a president much sooner, but as you can see I have a full life, and am so glad for the solid integrity of the HTE equipment and their opportunities to grow. I did attend the spectacular 2006 San Francisco convention, I hope to renew and make many new friendships at the Niagara Falls convention. Thank you Peter Poon and HTE CANADA!

Back and Knees

My name is Henry Vrugteveen. I have been using the HTE equipment - mainly the Chi Machine, HotHouse, and FIR Lumbar Cushion for almost a year now. By using this equipment, I have completely eliminated my chiropractor appointments and it also has really helped ease my constant pain in my back and knees.

I am a transport truck driver and take the FIR Lumbar Cushion with me in the truck and use it as I'm driving. I don't get stiff or sore from it and can drive for several hours at a time. My future goal is to pursue this full time as a home based business.

Bladder Cancer

In November 2009, we heard about HTE through Friends we met at Polka Festivals. We first attended a meeting in Prince Albert where we purchased a Chi Machine and an Advanced ERE to improve our "dancing" stamina and our overall health.

In November 2010, my husband was diagnosed with bladder cancer. He underwent an operation to remove a malignant tumor. After consultation, doctors suggested that his bladder, prostate and lymph nodes be removed completely and that he undergo chemo and radiation therapies. This was not an option for him. These procedures would no doubt inhibit and restrict his mobility and active lifestyle. We then considered alternative methods and realized that HTE had what we needed. Although we were already distributors, we had not paid much attention to the other HTE devices as the ones we already had were good enough for us at the time. However, this event spurred us into investigating and researching information about the SOQI Bed and we purchased it shortly after. My

husband would use the bed 5 hrs a day and followed a homeopathic treatment faithfully for 1 year. Doctors are dumbfounded! His last check-up resulted in a cancer free diagnosis! In fact, the specialist had told him he was nuts to go this route and that he would be dead in 6 months. Well, I guess they were wrong, this time. We know that this does not mean that it may not come back; however, it definitely gave him a more positive and less restrictive treatment plan. It has also given him more time to do the things he enjoys doing. The news of his results spread quickly and at first we were leery of telling people what he had done for fear of being considered crazy. We quickly realized that by not sharing our miraculous story we were denying others of healthier alternatives for their own health issues. Not only have we seen positive results in others which makes us very happy, our business has grown giving us extra income for us to enjoy what we love to do...dancing! Who says retirement means living in a senior home....not for us ...at least not yet!

Stroke in the eye

On February 7th, 2010 at approximately 10:30 am, I experienced a discomfort to the right side of my head as I was driving in to Prince Albert. From that point on I was seeing double. In order not to see double I covered one eye. On February 8th I saw an optometrist and after a complete examination he referred me to an eye surgeon. On February 10th, I went to see my family doctor

who sent me to the hospital to see a specialist who, after consultation with a neurosurgeon, sent me to see him for further examinations. I was told at that time that I had suffered a stroke to the sixth optic nerve of my right eye. This affected my eye movement causing it to turn inward. I was further informed that the damage should repair within six to eight months.

On February 12th, I started to use Power Eyes on max setting for 15 minutes each morning. On February 16th, I saw the eye surgeon and was fitted with a special prism

lens on my right eye. He agreed that it would take the damage six to eight months to repair. On February 24th, I returned to my family doctor for a follow-up

consultation and also to the eye surgeon at which time I was fitted with a weaker prism lens. March 3rd, I had a follow-up appointment with the specialist that I had seen at the hospital and was informed that I would no longer be required to see him. On March 9th I again visited the eye surgeon and was again fitted with a weaker prism lens. At this time I was asked what I was doing as the healing was exceptionally fast. I told him that I was using a health machine from HTE called Power Eyes. I was told to keep using Power Eyes. On April 7th I returned to the eye specialist's office and was fitted with a very weak prism lens. On April 14th I removed the prism lens and noticed a complete recovery. WOW!! In just a little over two months with the use of POWER EYES my vision had returned to normal.

James Van Der Haegen

Prince Albert, SK

Cataract

Some glasses may start at \$99 to \$149 for an average price range. Glasses help

your vision to be functional. There is not usually improvement in the eyes themselves with glasses. Corrective surgery is not guaranteed that it will fix vision permanently when performed. The cost of this operation varies from place to place but can begin around \$1,000 and continue in cost based on the severity of the person's vision. Even then, there is no guarantee that a person's eyes will improve.

With all of this in mind, I came to the conclusion that I had nothing to lose by trying "POWER EYES", and everything to gain. My name is Beth Olsen and I am a recent Manager, in Indianapolis, Indiana, and I am happy to share with you the experience I've had with HTE Americas Equipment and one of the latest advancements I've experienced with my vision. We have

used HTE's Equipment since December 2008 and have seen our health prosper as well as the health of our animals. As soon as the company came out with Power Eyes in December 2009, we purchased them and I began using them in the Spring of 2010. The 5 times I used Power Eyes, I heard a crackling sound in the center of my right eye. It was a start of what seemed to be a cataract. I continued to use it every other day and once more I experienced the crackling sound in the right corner of my eye. The next day I could see letters and lines without a vertical blur. I continue to use POWER EYES about 3 times a week and am noticing improvement in the horizontal blur. Thank you HTE for thinking outside of the box so we can see outside of the box!

**Elizabeth Ann Olsen-Indianapolis
INDIANA**

CHRONIC OBSTRUCTIVE PULMONARY DISEASE

My first introduction to HTE was through Jenny Morton from Woodstock, ON. In hindsight, I regret that I waited so long to respond to her invitation to try the equipment. Since I'm always open to new avenues of wellness, one evening in August 2011, I went to see her....no reason.... just because. I was very impressed on a few levels, however the one thing that induced me to explore further

was the fact that after just 5 minutes on the Advanced ERE I had some feeling back in my right great toe. I have no idea why I'd had no feeling there for so long as it was not discolored and I'm not diabetic so I asked Jenny for more information.

Two years ago I was informed that I have COPD (chronic obstructive pulmonary disease) and I must admit that I was starting to get quite concerned about my breathing issues. Through my research I discovered the Chi Machine and HotHouse will help oxygenate the body and I thought....what if??? Much to my delight the breathing has improved substantially. I also went through nearly 2 years of intense fatigue. The tiredness was all consuming and I felt so much guilt.

Things got further and further behind at home as I went through the motions of day to day. Every doctor (or specialist) I saw wanted to put me on anti-depressants as all test results were within normal range. I knew depression wasn't the problem nor drugs the answer. Jenny had recently read about a little known syndrome and after some investigation I found a naturopathic doctor who

dealt with it. He honed in on my adrenals. After 3 months on his protocol I could feel life coming back. So now we had a beginning....however I'd lost so much of my stamina. Using the Chi machine and FIR domes has given much of that back to me. WOW it sure is great to have energy AND stamina again. I had 2 spots of Basal Cell carcinoma on my face. Three years ago I let a surgeon remove one and I decided to work with therapeutic grade essential oils for the other. The essential oils (mainly frankincense) certainly held it in check, however it just wouldn't heal completely. After receiving my SOQI bed I started to use the FIR domes (one over my head, eyes covered with a damp cloth) and within days the second spot totally healed. I was ecstatic.

That was months ago and it's still fine. From time to time I'll still use a dome over my head. I've been working with a fine chiropractor for, among other issues, scoliosis on my right side. It's my belief that the Chi Machine will aid in moving me along at a faster pace and, in time, replace all those frequent long trips. The Advanced ERE, E-Power or Lumbar Cushion are wonderful to use if I decide to watch a TV program, as I'm able to accomplish 2 things at once. Like most people I'm not without health challenges. I believe the HTE devices are a marvel of technology and in many cases a "missing piece" to the puzzle. My SOQI bed is one place where I DO TOTALLY RELAX. For me that is a huge issue. I will forever be grateful for that warm summer evening I decided to visit Jenny AND to HTE for their amazing devices that have so much potential.

CEREBRAL PALSY

Alternative Medical Devices
Walking around a craft fair in Blaine, MN, the National Sports center, I came upon a booth selling medical devices. The longer I stood there waiting my turn to ask how much they cost, the more excited I was getting and the bigger my eyes were bulging. The moment finally

came.

'How much does the Chi Machine and the HotHouse cost? I need to know so I can start saving money.' The sale person replied, 'You haven't tried them yet.' But I said 'I do not have the money today.' I just knew that once I purchase these devices all the great health benefits I would receive would be great and I can start reducing my aching health concerns. The sales person proceeded in giving me a treatment with the Chi Machine, Electro Reflex Energizer and HotHouse, it was fantastic! The treatment made me feel calm, relaxed, as well as energized and I forgot about the aches and pains I had previously experienced earlier that day. My first purchase was the HotHouse which provides oxygen and circulation to the tissues surrounding my internal organs. My sores on my skin started looking better instantly. My headaches diminished quickly. This HotHouse is similar to the devices used in hospitals to treat jaundice in newborn infants. Since I have swelling in my legs and I feel the HotHouse has been a great relief that my feet and ankles do not bulge over my shoes anymore. Wow!

This HotHouse I can use in the privacy of my own home. The next purchase was the Chi Machine which gives oxygen, energy and circulation to the tissues and surrounding organs, the 'aerobic oxygen'. Using the Chi Machine prior to my workouts at the gym has enhanced my endurance and stamina tremendously. A couple years later the FIR Pad was available, I hopped on the bandwagon and bought this to place under me when I use the HotHouse or by itself to soothe my aching, stiff muscles and joint down my back. These products have

helped decrease pain, headaches, swelling, and given me a better nights' sleep. Last year in 2010 a new supplement, GO GREEN was introduced to me by the company HTE (Hsin Ten Enterprise) which I use prior to my workout and now I have increased endurance and strength that lasts from morning until night. Best of all I have lost 60lbs and will continue with this routine until my desired weight loss goal is achieved - but not soon enough. At the last convention I was able to purchase the FIR Lumbar Cushion which calms and soothes my lumbar spine. This cushion comes with an adaptor that I can use in my car. Great before and after the workout and long car trips. I also use it in the chair while performing my job duties.

There are many other products available and when the funds come my way, I will buy the Electro Reflex Energizer, Grande SOQI Bed, E-Power, Power Eyes and more new products that HTE will introduce to me. I am so excited that there is alternative products that can help me because I was born with several deformities resulting from Anencephaly and Cerebral Palsy. Conventional medicine procedures and medications have proven to be very difficult for me. I am happy that there are other alternative devices that have proven to be a good combination for me. My first accomplishment in life was my LPN degree and now achieving the use of the SOQI equipment. An accomplishment not achieved was being a pediatrician in rehab medicine, but these other two achievements work well. I was an avid volleyball player and I had tried hard to qualify for the Olympics to earn a scholarship to pay for Medical School, but this goal was not met. So if these SOQI Health Devices from HTE can benefit me, they can work for any person of all ages and medical conditions. If there are some minor exceptions, I can assist and together we work a plan around those difficulties using these devices. These HTE products do not intend to diagnose, treat, cure or prevent any disease or illness.

Circulation

I am very lucky to have all HTE devices. Greetings to all distributors! We are at the end of year 2011 and I would

like to share with you this unusual experience that allowed me to appreciate HTE devices even more. It was for me a period of big challenges. Since the last 3 years, I had 17 operations in the legs in the hope of restoring a better flow.

I've been using the HTE devices for 4 years now, so I probably slowed down the disease but not the symptoms. As there was no circulation at all, the foot turned black and the pain became intolerable. Doctors said everything had been done to save my leg.

I had to face the reality of amputating my leg above the knees on June 2. At this moment begins the process of recovery and rehabilitation. The pain after the operation was equally intolerable for over 2 months. After a few weeks, I started to use the HotHouse, E-Power with the Energy wand. These contribute to bring me some wellness. On September 12, I had to go five days a week in an institution for rehabilitation. I got my prosthesis a few days after my arrival. Several adjustments were required. However the pain is so strong that it decreases my motivation. So I use the Advanced ERE to desensitize the stump. It improves slightly the situation but not completely.

During the weekends at home, I use my prosthesis to do 5 minutes on the Chi Machine and 15 to 30 minutes under the HotHouse daily. I feel the same sensation of oxygen throughout my body as before the operation. I have the feeling of my leg as if it were still present. It is undoubtedly the most extraordinary phenomenon experienced since the amputation. As the pain is still present, we find after a series of examinations that there is a bursitis in the stump which will require an operation in early 2012 to be able to continue the process of rehabilitation for a few months more. Know that I dream of returning to the golf courses next summer, so I'll keep

my motivation to walk with this prosthesis. I am very lucky to have all these devices. When I am in rehabilitation during the week, I bring the FIR Pad and on Fridays, Saturdays and Sundays, I use my SOQI Bed at home to keep me physically, emotionally, mentally and spiritually strong. The Advanced ERE and the E-Power are also part of my care. Having the opportunity to give myself some wellness gives me hope. It helps me keep the focus on my recovery. I am always well supported by my wife Gilberte who sees that I find my autonomy as much as possible. She must adapt to all these changes and keep in touch with all distributors who are also very encouraging. She was involved in organizing the mini-convention and it was a success based on the comments of several people. Gilberte and I wish you all a "HAPPY NEW YEAR 2012" filled with "HEALTH, PEACE, LOVE, JOY, HARMONY, ABUNDANCE AND GRATITUDE FOR EVERYTHING!" Thank you to all my dear distributors who were very supportive! Thank you HTE for your support and encouragement in these times of great challenges.

Ovarian Cysts

I am very pleased how my health has turned around from using these machines. Here is my story using the HotHouse. My name is Gina Young. I was 48 years old

when I had been taken to the ER on Dec. 18th 2008. A CT scan revealed that I had kidney stones in both kidneys!! Not fun. I then got a call from the clinic and they said I needed to come in, something was found on the CT scan. An ultrasound was done to determine what it was. There were 3 masses in my ovaries. Ovarian cancer is what was mentioned, but not for certain, and not to worry. It's pretty hard not to. I knew Michelle Allmendinger of Montana who had been to Linda Zellers, used these machines with her bout with Ovarian Cancer. Also a girl from Sykeston, had used the HotHouse for 48 hours had encapsulated her tumors. I had to wait 6 days for the results. I called and got a HotHouse dome from Michelle's brother, Todd Grager. I figured if I do have Ovarian Cancer, I am going to get this dome over me for as long as I can and hopefully I will shrink what ever is in there. Well, after using it through the night Dec 23rd, my urine output was greater than my input. I woke up Christmas Eve morning and my midsection was not as

distended, the veins in my feet were becoming more visible, edema was going away, and my feet were not as sore. I dreaded walking, each step I took was excruciating. I had more energy. The fear that I had was GONE! I thought to myself there is something to this HotHouse. If I do have cancer, I have something that is going to help me tremendously. I knew then, I was going to buy a SOQI Bed. I figured, imagine what 3 domes can do for me and a Chi Machine. We bought one, had it set up in our house that January. It was discovered that I had Complex Ovarian Cysts. I needed to come back in 6 weeks to see if they had changed. If not, I was headed for surgery. I used the machines faithfully 1 hour before work and sometimes 3 hours after. I went back in February, had the ultrasound done, and the right cyst had disappeared and the left shrunk down in size, that no surgery was necessary. With the help of the Chi Machine, a large kidney stone was passed March 9th. It was big, and curved with 2 thorns on it. My twin Peg has also had good results with the HotHouse that she had purchased. She has more energy and is dropping water weight as well. I only wish our triplet brother Dan had access to these machines sooner because he died of Congestive Heart Failure on June 1st 2009. The loss was huge. Thank You HTE and the inventors for these life giving machines! I am forever grateful!

Detoxification

After Medical tests, I was revealed to have high levels of mercury stored within my fatty tissues and major organs. Patricia and Peter Danchak introduced me to HTE's therapeutic products. The Chi Machine, HotHouse and

Advanced ERE are at the core of my deep cellular detoxification process, and what a difference they have made in my life! As an R.N. for over 20 years, I am amazed at what HTE's Class 2 Medical Devices are doing for patients suffering from chronic, debilitating

illnesses. Just this month, I was privileged to become a part of an Integrative Health Care team at a local Health and Wellness Centre, where I will have the opportunity to introduce the SOQI Bed, Advanced ERE and E-Power to new clients. I am so excited! My aim is to encourage health consumers as well as health professionals to pursue non-invasive, drug-free and holistic approaches to health. Thank you HTE! My present goal is to focus on the SOQI Home Spa Owner Program and the SOQI BEST Team Concept. I can't wait for the training!

Diabetes

On June 14, 2012, the members of my HTE group who were able to attend, were treated to a presentation by Peter Poon who came to my house in Calgary to share

the exciting research Dr. Cabriales has conducted in Mexico, using the HotHouse, the E-Power; and the AlleviAider. The people who arrived early at the presentation were given the opportunity to be tested on the Energy Measurement Device Peter brought with him. They were able to see where their energy levels were low and how to use the HTE machines to adjust them.

Peter's presentation on Dr. Cabriales' four years of research was very interesting and informative. We learned how Dr. Cabriales used the HotHouse and the E-Power to save diabetic people from losing their limbs.

This is very important because diabetes is quickly becoming an epidemic with more and more people being diagnosed with it and in danger of having their limbs amputated. Dr. Cabriales' discovery is that the HotHouse and the E-Power did not cause non-diabetics to become hypoglycemic is great news. Dr. Cabriales' research on the use of the HotHouse and the AlleviAider in the treatment of sports injuries showed us how powerful these machines from HTE are in speeding up a person's healing time. My husband and I have both personally benefited from all of these wonderful machines HTE has to offer. Thanks, Peter, for sharing the research information with us.

Diabetes

I would like to take this opportunity to share the one testimonial that particularly took priority this summer. My mother-in-law, Laurence, who is 85 years old, has had to cope with diabetes and other health problems for many years. She has greatly benefited from utilizing the awesome HTE Products since 2009. This summer she lost a big toe nail due to diabetes. It was healing very slowly and eventually some infection set in. Although she was fearful of amputation, she persistently continued to use the Chi Machine and especially many hours under the HotHouse. To date MOM is so very happy to be able to share with everyone that her toe is completely HEALED with absolutely no complications. PRAISE GOD for so many blessings!!!

Cheryl Wirch (on the left side) and her sister at the HTE gala in Winnipeg

Diabetes

My name is Cheryl Wirch. I live on Broken Head, First Nation Reserve. I have six children and 4 grandchildren. I purchased a Chi Machine on January 2009. My relatives, Norma & Larry Patzer kept telling me about

this machine that I should try. I kept putting them off, as if a machine could help my problems! I will never regret buying that machine. I was diagnosed with diabetes in 2003. My health was failing slowly. I had diabetic ulcers on my feet. I could barely walk. I was tired, stressed & had no energy all the time. After 5 days of using the Chi Machine, the sores on my feet disappeared and I started feeling better, I also had more energy.

One month later my daughter Shaylee who was 15 years old took her own life. I didn't want to live anymore. Depression set in. I lived day by day but continued to use my machine. No parent should have to bury their child, they should bury us. I am employed at a gas station and a restaurant. I work evenings & weekends. After my daughter passed away, I had to stay busy. As time went

on, I noticed a difference in myself. I started telling others about my machine. Some people laughed at me, others tried it. I guess others thought like myself in the beginning. I told everyone that would listen.

I am not getting paid to speak about the machine nor do I collect any money for profit. I just want people to feel as good as I do. As an aboriginal person I know our people are plagued with illness such as diabetes, blood pressure, etc...

My health has changed drastically in two years. In July I went for a physical check. My doctor was amazed because my sugar level was normal. He even thought I quit smoking as my lungs were clear. He asked what I was doing. I told him and he acknowledged the Chi Machine and told me to keep using it. As a physician he was not allowed to enclose such holistic items. I have seen amazing results such as thicker hair, normal blood sugar, low cholesterol, and clearer skin. If I get a headache I go on the machine. I haven't needed to go to a chiropractor. Emotionally, it appears to help with my depression. Folks compliment me; others who haven't seen me for a long time say they can't believe how good I look especially after what my family had been through.

I look back and thank the creator for changing my life. Thanks to a lot of prayers and to my Chi Machine.

May my creator bless you in all you do!

Cheryl Wirch

Distributor Experience

I was looking for a new service for my clients when I was told about medical devices. I am a naturopath and iridologist. After 15 years of practice, even though

I love my work, I needed something new and also to offer my customers a way to relieve pain without taking too many supplements, let alone drugs.

The Far infrared treatments and Chi Machine responded to what I was looking for. I fell in love immediately. I was sure I could help my clients take care of their health. The most important is that those I talk to feel it, they know I am sincere and credible. I know that I offer quality products and I am confident. Even if I have only been a distributor for a few months, I have testimonials of satisfaction and it encourages me. It is the perfect complement to better serve my customers. Thank you to Lisa and Gilberte who supported me and always answered my questions. I am ready to go a long way with HTE.

Michele Dumas
Manager Level Distributor
Gatineau, QC

I am Edna Rogers from Mayfair, Saskatchewan, Canada. I've been a rancher and farmer for 43 years. I've been an HTE distributor for over 9 years. Getting up front and speaking was not something I was used to doing. About 8 years ago I hosted my first meeting in

Saskatoon. The crowd was large

and I was scared. Shawn from the HTE Canada office came to support me. As people kept coming, Shawn kept asking, "Are you alright?" I just knew I had to brace up and get the message out. Every meeting, since that first one, kept getting easier. I've done well over a hundred to date. Today, I'm proud to be the DSM winner for all of Canada. I recognize the importance of doing DSM meetings. It draws the people together, keeps distributors focused and motivated. It allows me to support my group. HTE supports us with a free door prize that people are excited about winning. I deeply appreciate the support that the company is willing to give us. I want to challenge each of you to go home and begin DSM meetings in your home towns. Don't think about how far you have to drive, think about how you can support your teams.

Pearl President Level Distributor
Mayfair, SK

Distributor Experience

I have a great interest in staying healthy and young looking. This is so important to one's quality of life.

Four months ago I was introduced to the E-Power and its long list of health benefits. Little did I know that I would soon fall in love with the ERE, Chi Machine, and Far Infrared HotHouse as well. Why am I so

grateful for all of these innovations? Because of the increased quality of life they can offer humanity.

The support materials of brochures, testimonial literature, and DVDs are impressive and a real asset to succeeding in the business. It is easy to communicate using these tools. I consider myself successful just by sharing this vital information with others and allowing people to do as they wish with this new knowledge.

Most importantly I have fun doing the business. It is enjoyable to watch people "light up" when they are on the E-Power. Over and over again I hear about how people like the "feeling" when the Chi Machine stops and they just lie there and experience the healing. The ERE

feels fantastic on my feet and the knowledge that the pound mode is ridding my body of parasites is most comforting. What a treat it was when we created a mock SOQI bed, as three of us brought our HotHouse and lined them up on the floor. Everyone at the meeting got to experience the expanded radiance of the HotHouse.

It brings joy to my heart every time another person is happier and healthier from using HTE products. How many people do I know that would like better health and more energy? Everyone!

I earned the trip to Dallas this year and I am looking forward to Las Vegas and other trips. We will continue to hold large monthly meetings in Reno as well as many home parties. From these happy customers, Distributors, Supervisors, and Managers will be created and it will naturally follow that I become a President in the company.

The Dalai Lama communicates "What is the meaning of life? To be happy and useful." I find that my involvement with HTE and the sharing of these valuable products enhances the meaning and positive purpose of my life. I am blessed to be a part of HTE.

Linda Tierney
Las Vegas, NV

Distributor Experience

I am sincerely so grateful and excited on my promotion to Manager as from September 1, 2010. My road to regain health and financial success and freedom has indeed exceeded all

my expectations. First and foremost I would like to thank my personal Lord and Savior, Jesus Christ for blessing me so richly. My prayers have truly been answered. I feel so proud and honored to be part of my awesome HTE family.

A heartfelt THANK YOU for all your support and assistance especially to Karen Cronk, my upline, for all her tireless never ending leadership and guidance. Not only is she my sister in Christ but she will always be my HTE sister. All of the HTE home health devices and products have indeed been a godsend to me and my husband Oliver. By using all of these modalities which we are now the proud owners of; our lives have been dramatically transformed and enriched forever! Our bodies have been exceedingly restored to wellness and good health more day by day. Because our pain and ailments have been much alleviated to absolutely NO PAIN at all; and all our stress has been replaced by

much increased energy, we have been experiencing much happiness and joy in our daily lives.

We truly believe that we have been blessed with restored youth and vitality in our lives forever. Praise God!! Our ultimate commitment is to use our HTE home health devices FOR THE REST OF OUR LIVES! I am very grateful and thankful to be able to fulfill my true passion and call in life and enjoy doing what I love best - my desire to work with and help people to enhance their lives and well-being. I feel so blessed and thankful for this awesome privilege and opportunity; as I continue to witness the incredible results in the lives of my friends, neighbors and loved ones as their various ailments are being alleviated each and every day; and listening to the many absolutely unbelievable testimonials of how their bodies are being restored to wellness and good health.

All the honor, praise and glory to God!! Thank you Jesus!!!

Birch Hills, SK

Distributor Experience

Everyone always asks how I got started in natural health, to which I answer, "The passion was God given." By age 9, I was collecting dandelion greens from the back yard and during my teenage years I was hiding multi -vitamins from my mother in my sock drawer, much to her chagrin. As a wife and mother, my journey turned into a pantry full of mason jars filled with mysterious herbs for every ailment, meal and occasion for which my teenaged niece and nephew were convinced I'd end up jailed. My husband and I then home schooled our children and I incorporated my passion into our science and health classes. We planted herbs, harvested them, dried them, and made them into salves, ointments, lip balms, and poultices. Amazingly enough, we managed to raise three children feeding them healthy and nutritious food and not one of them has grown a second head. Imagine!

During the past 25 years I have read and studied hundreds of books, managed a health food store, participated in numerous seminars, became an ordained chaplain, a Certified Natural Health Professional and plan to continue with additional training via several venues.

It is my conviction, that one must address their health issues physically, emotionally, and spiritually. The three are intertwined and one affects the other. I also believe that there is usually more than one right way to accomplish a person's health goals and my desire is to help others find the ways that will make their health goals a reality. I am a follower of Jesus Christ. He is my Lord, my Savior and my very best friend. When I work with people, I take their name before the throne of heaven.

This is the very best part of what I get to do for them.

It was during my quiet time one day when I prayed and implored, "Supplements just don't work for everyone. There must be something else." Through an interesting series of events, the Lord introduced me to the Chi Machine and HTE through Nancy Yoakum. I thank God for her. He knew what I needed, who I needed, and he knew what my clients needed. Nancy has been a wonderful coach, teacher and prayer partner, lifting me up, being my encourager and mentor.

My success on becoming a President, is largely due to an incredible success-line of individuals who care more about bringing hope, health and healing to people, than they care about a commission cheque. This seems to be common among the HTE Family and sets them /us/ you apart. It is your sincerity, genuineness and transparency that makes you approachable, trustworthy and successful.

I was privileged to be a part of the healing of many people, yet this one stands out as most touching for me.

Eczema

I am writing in reference to the Go Green product and the amazing results we had with my son.

My poor kid has suffered with severe eczema all his life and he is now 17. When he reached puberty he was then plagued with severe acne as well. He pleaded with me to take him to a dermatologist but I have been adamant about him using anything that may have cancer causing effects even in high dosages with rats. So,

we tried every natural cure and diet we could find to know avail.

His eczema was so bad on his arms that the skin was raised, bright red, bleeding and almost ropey looking like a burn. He was wearing bandages at night so he wouldn't scratch and make it worse. His face was completely covered acne. There was no space where you could even see regular skin. He was desperate and so was I. He was so embarrassed to go to school and one morning the eczema was so bad that we had to bandage his arms to hide and protect. He was using make-up on his face because he was so sensitive about how he looked. The day after the bandaging episode I

went to my myotherapist, Tom Benson, and mentioned that I was looking for a "green" product for my girlfriend who wanted to detoxify because of some lymphoma issues. Tom recommended the "Go Green" and did the muscle test on me. Of course, I fell over and decided to take it home. I talked my kid into trying it and low and behold, the NEXT DAY, the eczema disappeared. It was unbelievable! About 90% of it was gone and the ropey, thick skin was flat and all that was left were a few scabs. The bright redness also disappeared. His face literally cleared up also. I'm not saying there was no acne but amazingly his face almost looked clear and was nice and smooth.

We didn't take "before" pictures because we had no way of knowing we would have these stupendous results!

I would highly recommend this product to anyone suffering from eczema and I can tell you from experience that we have tried everything since he was a baby.

I thank the man that developed this product; you saved my kid's skin and his mental well-being!

Catherine Hunt, Distributor Level
Blaine, MN

FIBROMYALGIA

My name is Shari Widowski and I would like to share with you my experiences from using the HTE wellness equipment at The Organic Health & Wellness Center in Beaver Dam, WI. I share this information to indicate just how much this equipment has improved the quality of my life and how much it has helped

reverse the symptoms mentioned below. About 7 years ago, I was diagnosed with Rheumatoid Arthritis (RA), & Fibromyalgia. The RA seemed to be mild and was managed with a mild dosage of medication. The Fibromyalgia however, affected me the worst and required a high dosage pain medication and muscle relaxants. To add to these problems, in October of 2010 I was diagnosed with a somewhat rare pulmonary disease called Interstitial Lung Disease, which is very rare for someone my age.

My lung tissue is scarring, and the symptoms include a chronic cough and shortness of breath. It was progressing at an alarming rate and it was quite frightening to think of your breathing being limited to short breaths and chronic coughing throughout the day and night. My chest and rib cage always felt like they were in a vise grip and would not release. Whenever I would see Brenda Kuhl, the owner of The Organic Health & Wellness Center, long before my disease was formally diagnosed, she would share the information and merits of the SOQI Bed™, Chi Machine®, Reflexology (ERE™), and E-Power™ with me. I would listen, but truth be told, I did not believe that this or anything would help me. As the year went by, my symptoms progressed and my life seemed to plummet out of control. When Brenda saw me in despair, she encouraged and offered me free sessions with the equipment just to see if anything might help. She was very convincing and wouldn't take no for an answer, so I finally agreed and we were on our way to the first of many sessions. This was long before the pulmonary

disease diagnosis. Brenda thought the HTE equipment might ease my symptoms of RA, Fibromyalgia, and maybe even help my cough. I was on leave from work at the time because of my health problems. Brenda allowed me to use the equipment whenever I could come to Beaver Dam as often or as long as I wanted or needed.

After the very first session, I thought, "Can this be? I can breathe easier!" And that vise like feeling on my chest and ribcage was actually gone at that very moment! Hmm, there must be something here that I can actually get some help and relief from. I did not have that systemic fatigue and pain. I felt "lighter and free" after just one session! Brenda explained that when we give the body what it needs, it will heal itself. I was completely sold and a new believer. I was allowed to use Brenda's equipment until I could purchase all of my own equipment. In 2011, I was able to discontinue the use of all my meds (6 daily dosages) for my Fibromyalgia. I have so much more energy and the worst part of the chronic cough has diminished by more than 85% - most weeks it's negligible. This number continues to climb. The lung disease I have is controlled by strong medication as well.

About 6 months ago, I found out that I have Asthma, so weather and air quality play a major role in the severity of my symptoms. I believe this condition could be much worse had I not tried HTE's equipment. Every time I see Brenda, I wholeheartedly thank her for not giving up on me. I now recommend and share the equipment with family and friends. One of my friends has severe back issues with constant pain, and the other has shoulder problems. After using HTE's equipment, they came away feeling the same way I did, pain free and able to take on a new day! When you suffer from a debilitating disease and chronic pain, it is truly a miracle to stop using pain medication and really start to live your life again. I have always been perhaps overly cautious or a "Doubting Thomas" before believing in something that can work so quickly and so successfully. I no longer doubt that this equipment can help anyone who uses it!

Shari Widowski

GANGRENE

In February 2012, my mother Rosina Matschkal began feeling extreme pain in her toe and she had to be rushed to the emergency room. The toe was so sore that she could not walk. When the doctor examined it, he concluded that she had contracted Gangrene, a flesh eating disease. He provided her with a cream, and sent her on her way mentioning that if it got worse an amputation would be needed. I immediately put my mother and her foot under the HotHouse™. She used the HotHouse™ for two and a half hours twice a day

everyday. By her next doctor's appointment, he told her how surprised he was with the result of her toe. He told us the toe had rejuvenated all new tissue. This happened twice to both feet and both times the HotHouse™ helped in the treatment of the Gangrene. I enjoy promoting and working with HTE and their products. The products really work well in promoting health and the incentives the company provides are great. I was a SOQI Club Winner and got awarded with a \$150 product voucher!

Renate Matschkal
Supervisor Level Distributor
Laval, QC

HEADACHES

My first experience with the AlleviAider was at the SOQI Center HTE meeting in Vadnais Heights, MN. I had a headache and asked if I could use the Alleviator™. I used it on the base of my head for ten minutes and then moved it down just a little onto my neck for 10 more minutes - and the headache was

completely gone. I had this experience 2 times with headaches and had the same happy experience.

NO ASPIRIN, which is really good for me and what I would normally have used both times. Also, when we were up at Blackduck, MN in February for training with

Linda Zeller, she let us take the AlleviAider to our hotel room. I used it on my elbow as I was experiencing tennis elbow and on my wrists as I was having pain and feeling weakness in my joints. After using the AlleviAider for three nights in a row, alternating from my elbow to my wrist, I felt much relief and now I am milking my cow with absolutely no pain or weakness in my elbow or my wrists. I used nothing else. My daughter also had a headache and we got the same results for her too! The AlleviAider is on my list as my next investment. MUCH BETTER THAN ASPIRIN! We are hoping to add this to our SOQI room at The Country Retreat Home soon! I am thankful to God for giving us the tools we need to better our health!

INDIGESTION

I am better than ever at age 82!!

I walked into the St Thomas Hospital on November 28, 2007 with a small indigestion problem in the chest area at age 77. I had been having this condition for about 3 months, but it would go away very fast. Within 10

days I had quadruple bypass surgery. By using the HotHouse twice a day I helped my body to produce nitric oxide to help prevent a heart attack and strokes. This is the reason I believe I am still alive and I am better than ever at age 82!!

INFLAMMATION

Hello, my name is Jeannine. I am an independent distributor since April 2011. I live on the North Coast in Baie- Comeau, a beautiful place of the country. I take this opportunity to thank the team of Claude and Johanne for the training and help that they have given us in early February.

It is almost two years ago, that I was in bad shape because of old injuries of all kinds, which often goes untreated. I needed two massages per week. I was having trouble walking for a long time, chronic muscle pain, stiffness throughout the body and inflammation.

A friend, who is a massage therapist, bought the SOQI Bed for her centre and she suggested me to try it in addition to my massages. I felt so much benefit all over my body! I have used the SOQI Bed all winter. She told me that I could have the HotHouse at home and I was

convinced that all devices would be important for me. I bought all the devices at my own pace because they keep me in good health and give me a better quality of life. I use the devices every day. My favorite device is the HotHouse. It is a great opportunity to relax and combine business with pleasure. Following an evaluation with the EMD, I follow my protocol. By using all the devices, now I can function better: less pain, less inflammation, more energy, and vitality. Knowing that it improves health, I have talked to my relatives about it and now they have bought and use the devices every day like me. I take every opportunity to talk to the people I meet. This is my experience with these wonderful health devices and I think everyone should have these devices at home.

Sincerely,

Jeannine Garon
Supervisor Level Distributor
Baie-Comeau, QC

INFLAMMATION

I know the Chi Machine and the Advanced ERE since 2008 from David Fafard at a conference. I tried the Chi Machine and the next day I noticed that my sleep was much deeper than usual. It was very good for me: better quality of sleep, better health.

Subsequently, I was invited to try the HotHouse. Ah! I was amazed

by the great benefits of relaxation it gave me. I can tell

you one hour under the HotHouse brought me so much energy that night. The HotHouse reduced the inflammation in my body. If I had pain, I went to use the HotHouse and everything disappeared. It's wonderful. My greatest wish is that each home must know the HTE devices that improve our quality of life. I am always available to share these quality products to all people around me. I want to thank HTE for these great inventions. Congratulations to all of you.

**Yolande Cote, Manager Level Distributor
Quebec City, Quebec**

INFLAMMATION

The first time I had the opportunity to see the devices of HTE was in the summer of 2007 during a visit to Bernard and Linda's in Ste-Adele, Quebec.

Gilberte Boisvert introduced me to these devices. She was visiting them and

there I tried the SOQI Bed, the Chi Machine and the Advanced ERE. Although I didn't have any discomfort at that time, I still enjoyed the energy transmitted by these devices. It was only in winter 2009, two years later, during a visit to Colette Demers in Quebec City where I attended a demonstration of the HTE equipment by Bernard Royer that I could enjoy the benefits of these devices again. At that time, I had a persistent pain in my right knee and I could not walk normally. I had the opportunity to try the SOQI Bed

by volunteering during the demonstration. After 7 to 8 minutes under the HotHouse, I felt a click in my knee. When I got off of the SOQI Bed, I felt that the heat was good for my knee. To my surprise, I was walking differently and with greater ease. That session was convincing enough for me to decide to buy all HTE equipment for my own use at home. That's when I decided to become a "Distributor" in the days that followed my decision. My greatest desire was to introduce these highly efficient devices to my family, my friends, and as many people as possible. The results were quite impressive for many people who used them regularly and I continue to see the benefits of these devices on many other people and myself. I was recently promoted to "Manager Level" and I am very proud and happy to be part of the wonderful team of HTE.

Manager Level Distributor
Lac Beauport, Québec**

Knee pain and severe swollen ankles

I was to have a knee replacement in June, 2011. I suffered with a lot of pain in my knees and had severe swollen ankles. I took a lot of pair of pills to combat the constant pain that I lived with. I also had cancer.

In February of 2011, while visiting Ken and Gloria

Arends in Minnesota, I was introduced to the HTE equipment. I used the ERE. I slept well that night and in the morning I realized that the swelling had gone down in

my ankles and I didn't feel the pain as much.

My husband suffers from very poor circulation in his legs and knees. He has the Chi Machine and HotHouse and used it. He was also introduced to the ERE and didn't feel even the slightest tingle when he first used it... and that was when it was cranked right up! I massaged Norm's legs often to help with the circulation but now with the help of the medical devices, his circulation is a lot better.

**Wanda Tilley
Supervisor Level Distributor
Portage La Prairie, MB**

Neck Pain

I was introduced to the Chi Machine in October of 2010. After feeling the Chi running through my body, I immediately felt the need to find out more about the HTE products. I went to visit Peter and Pat Danchak to use their equipment and was impressed with the way I felt after each session.

With the knowledge Peter and Pat had about the equipment, I could tell they truly wanted to teach people how to take care of their own health. The thought of having my own health equipment in my house to help myself and my family was an awesome idea. After one of my sessions, I was at the store where everyone was

complaining about the weather being cold and damp. I thought to myself, 'What are they talking about?' After I left the store I realized that using the HotHouse and Chi Machine, it obviously left me feeling very relaxed and brought my temperature up a degree or two, because usually I'm the one complaining about being cold. I was going to the chiropractor every week for a few years. By the third time using the Chi Machine I felt my spine being adjusted and my neck wasn't sore anymore. My neck was sore and stiff for about 6 months before buying the Chi Machine and the chiropractor was not helping my neck. I knew then that I needed the equipment in my house and to help other people discover the power to help themselves to get good health and stay healthy. Thank you HTE for these lovely pieces of equipment.

Yours truly,

Jenny Morton

Neck Pain

Unlike most other Chi Machine users I wasn't introduced to it, but went looking for it. I am an AtlasPROfilax practitioner. AtlasPROfilax is the correction of the Atlas vertebrae, or C1, which releases existing tensions by a specific massage of the short neck muscles and by doing so to allow the Atlas to slide back into its original position, thus starting a self healing, self alignment process in the body. I work mostly with clients who suffer from various back, neck, hip, and knee problems. After the atlas correction it is crucial to support the self-healing process with any modality that relaxes and releases the muscles along the spine.

Usually if a client comes in who's atlas is not in the correct position, i.e. due to whiplash, their neck and back muscles carry much tension and they usually have a lot of back pain and problems. I noticed that a couple of new clients, who's atlas was out a lot, had little to none back pain problems and their back muscles were very loose, which is unusual. Both were using the Chi Machine for a

long time. I did some research and was very impressed by everything I read about the Chi Machine as well as all the other products. I just wanted to try out the machine for myself so I could recommend it to my clients. I found Henry & Hannah Vrugteveen, who were kind enough to bring all their machines over and explain the business model.

I signed up for the SUC Express Package before they left. I personally love using my Chi Machine, especially after a long day - after 15 min on it I feel great, full of energy again. What I usually do is I let my clients take the Chi Machine home to try out for a week or two, so they don't have to take my word for it, but can experience it themselves. All my clients are very happy with the products. One client bought The Chi machine for her back problems and she not only feels better now, but sleeps much better as well. The Chi Machine sells itself.

Neck Pain

This AlleviAider is amazing. I broke my C7 neck bone over 1 ½ years ago. I've been in pain ever since. Taking lots of painkillers. Today I tried this laser and it worked well. My pain was 7 out of 10. After using the laser the first time it went to 4 out of 10. I like it, I want one. I'm a

construction boilermaker. I'm sure it will help my life get back to normal. It's compact and easy to use. It's great. I'm 53 years old.

Robert Sanderson

OSTEOPOROSIS

In 2006, my wife had been rehabbing for 14 years after a head on collision. Yes, it helped and kept her out of a wheelchair, but she still had constant pain. She had to push herself up after sitting and was bent over till she crossed room. She had to sleep on her back with pillows under each arm. Sciatica and osteoarthritis were big problems. In 2006 (Feb) after taking X-Rays, her doctor reported she has bone spurs all down her spine and her cervical and lumbar spine were in the last stages of osteoarthritis. Therapists kept insisting she stand straight but as soon as she stopped concentrating on that, she slumped. After losing the use of her left arm, she had to hold it when walking or doing stairs. Pain!

I, Marvin, had less than 50% breathing left because of asthma. When you are struggling to breathe you can't get much done on the farm. Life seemed like one step forward, two steps back. One day a friend called and told us about the HTE devices. Normally we would have been skeptical but not when we were at our wits end. We tried them for 6 days and ordered our own! Three months of twice daily use and Simonne went off three medications. 1. Meds for total digestive system. 2. Went from 150mg pain meds to 10mg. 3. Meds for restless leg syndrome. Plus her carpal tunnel operation was cancelled. My own breathing was improving. Thank you God! Well, it's never stopped improving and Simonne said after 8 months I had stopped snoring and endangering her life by throwing my arms and legs around in my sleep and I was out working 8 hours a day.

My wife could now hold her arms over her head and the 2 pillows were gone. Her hips didn't hurt constantly and her knee was better. No help needed to get out of a chair. Nine months later, she could stand up straight. No more sciatica and vitality galore! Her range of motion for neck and lumbar were about 65% now. After 7 years it is 95%. We continue to use the devices every day and bring them with us when we travel, which we did recently when going to a 60th anniversary for 2 aunts who were both in their 80's and have been using same devices with great results for osteoporosis, osteoarthritis and not

having to have a knee replacement after all.

Naturally, relatives were curious about how well they were doing 'What was their secret?' They referred them to us and when they tried the devices, two people purchased SOQI Beds plus ERE and E-Power. Another cousin got the Chi Machine, HotHouse and FIR Pad. That cousin is now looking forward to getting a SOQI Bed. Another cousin from USA also purchased a set.

On our way home we stopped at a friends (who had seen DVD about devices) and they ordered the Chi Machine and HotHouse. She has pacemaker, so the Advanced ERE and E-Power were out. From the bottom of our hearts, we thank God, our friends and HTE for these miracles. We also thank HTE for all bonus trips we've enjoyed because of all the people we've been able to help. It's very heartwarming.

Sincerely,

**Marvin Dosch, President Level Distributor
Teulon, MB**

OSTEOPOROSIS

I will tell you my story about my health. It all started around October 2008. I had a lot of osteoporosis in my shoulders. I was unable to dress by myself. Then my daughter Colette Guenette introduced me to the

Chi Machine. I can tell you that immediately I felt the benefits. Subsequently, I had heel spur (heel pain). I could hardly walk. As I didn't have the HotHouse yet, my daughter Françoise insisted that I go for treatment in her

spa for a half hour 2 times a day. I can assure you that after three weeks, my heel was cured and no

heel pain ever since. I also wanted to mention that before I knew these health devices, I was vomiting every three weeks to one month in the evening and at night as well. Now I don't have nausea at all. I am 80 years old and my husband is 87 years old and we are still living in our house. We cannot live without these extraordinary devices. I challenge all man and woman to get these devices. Thank you to my two daughters Colette and Françoise Guenette.

SCIATIC PAIN

My first exposure to HTE was an advertisement offering a free 30 minute session on a SOQI bed. I had a background in holistic health and was in the process of getting back into it and the ad intrigued me enough to check it out. With coupon in hand I

went to see Aime Hebert at Bonded Health and asked for my free session. I was so impressed with the concept and the unit that when Aime invited me to a Gala Dinner I said yes. At the dinner I heard and met an HTE President, Bob Nelson of Minneapolis. What attracted me to Bob was that he had been in the restaurant business and I still owned a restaurant with my wife. Bob could understand our frustrations and I still remember him saying, "Let me encourage you in this. There is life after the restaurant business." I had already been in the process of moving myself out of the restaurant and back into the health field and this was the encouragement that I needed. I established a company called The Chi House Wellness Center in Selkirk and opened an office where we offer a number of holistic health services including reflexology, massage, ear candling, pain relief therapy - very often combining the use of several different pieces of equipment and tailoring the therapy to suit the clients needs. We very often start with the E-Power as Dr. Justo Cabriales has recommended. It is not uncommon for us to have a client on the SOQI bed with Advanced ERE pads on at the same time.

Although, we sell equipment, we find a number of people are opting to rent for a month or two first. As for successes, we have seen many. I have to admit I am addicted to the rush when someone comes into our clinic with support on both sides because of tremendous sciatic or back pain and after an hour on the SOQI bed get up and walk out on their own; or when the client who has been renting a HotHouse and Chi Machine for the last two months comes in and says their surgery to remove 2 tumors is cancelled because the surgeon checked them over and can't find the tumors; or the daycare worker who put the kids at the daycare on the Chi Machine and then had to explain to the parents that it was the Chi Machine not drugs that had calmed the kids down; or my wife's cousin who came to me with diabetic ulcers on her legs that had been there for 3 months and after two weeks on the Chi Machine they were gone and a year later her doctor says she is no longer a diabetic. Then there is my wife, who gets on our at home SOQI bed for an hour every morning. Trust me, you haven't got enough money to get it away from her. Also important to me are the friends I have made, especially Dan Bigelow who has become a great mentor, and the fun I have had because of my involvement with HTE. A company which if you haven't noticed is extremely generous and I am so proud to be associated with them. Reaching Manager is great and I shall celebrate today, but tomorrow, I start for President.

SCIATIC PAIN

I was delighted to win the SOQI Club this month. I have been using all the HTE products for my own health for a number of years and had talked to some people about them. Although I would sell some machines from time to time, I had not actively pursued selling them. This year I had lent my Chi Machine to a friend who

was having difficulty sleeping. She experienced such wonderful results that she decided to buy a machine and signed up as a distributor. In less than two months she became a supervisor. She got me thinking about what a difference these machines can make to a person's health

and life. Many people are living with serious illness and pain, and as a HTE member it gives me comfort to know I am able to help them.

As for myself, I had experienced a frozen shoulder and I could not reach across my desk to answer the phone. I had sciatic pain in my leg that was unbearable when it flared up, and I had an issue with dizziness. Sometimes I could barely sit up from my bed without the room spinning. These symptoms are gone and I have forgotten about them, thanks to the devices I use.

It feels so good to have someone tell me how much better they feel and how much more energy they have after using their machines. I believe you cannot put a price on health.

Brenda's mother

SHOULDER INJURY

On Aug 6, 2010, my mother of 87 years old took a severe fall against a building causing all of her body weight to come down on her

shoulders and arms. She received two clean breaks and a fracture to her upper humerus bone. Her surgeon was unable to determine the condition of her rotary cuff given that she could not lift her arm, thus giving us three options. The first was surgery, which would not be possible due to her age. The second was to put her arm in a cast and the third was to use a sling until the arm heals. In order to be able to use the Far infrared on the break, the third option was chosen.

My mother still lives on the farm by herself and she is very independent. As we all know this accident could have been her loss of independence but having so much confidence in our medical devices we knew it would not be the end. My sisters, Cindy O'Millian and Lynn Traxler (also HTE Distributors) and I started with immediate treatments. We chose the 'no ice' method and started using therapeutic-grade essential oils, the E-Power and the HotHouse. The treatment was half hour on the

E-Power two times a day on low (being very cautious when working with the elderly and monitoring very closely any side effects). The HotHouse was used in the first several days up to four hours a day. By day four she was feeling so good she decided to go visit her grand daughter who lives two hours away. Going twenty four hours with no oils or machines caused her to be in severe pain the next morning. I spent the next eight hours working with the oils and machines on the reflex points that are on the Advanced ERE brochure and had her feeling 75% better by evening.

After day four the HotHouse treatment was then decreased to only two hours a day. The pain was significantly reduced and isolated to only the shoulder and upper arm area, with minimal swelling. She also had no aches and pains from the fall on the rest of her body. I believe this was due to using the E-Power given that the Far infrared was only used to treat the local area. On day ten, we returned to the surgeon for another check up. He was very impressed when he took off the sling and she automatically straightened her arm out. Most people that have this type of injury would be frozen with little to no movement in the arm. She is still improving daily and at week five has 90% range of motion, as you can see in the photograph of her during therapy. Thank you HTE for such wonderful devices that we can use in the comfort of our own home to heal our bodies from injuries!

SINIUS ALLERGY

I was skeptical. After 2 years, Colette came to my house to introduce me to the SOQI devices. I have been dealing with allergies for 35 years. On our first try with the

Chi Machine and HotHouse, it released a lot of sinus pressure. I really enjoyed my first experience with these devices. Three weeks after using these machines, my sinuses have released even more and my breathing has improved. Now, when I get a cold, it only lasts for a duration of three days. After each session with the devices, I feel that it is working. After 5-6 weeks, my nose has completely cleared. I feel very good and I have a lot more energy. I feel a change in my mood, and much more alert. Each morning I wake up with more energy and I could not live without my SOQI Bed anymore. Thank you Colette Guénette. You are a little ray of sunshine and full of energy. I just wish that everyone had a SOQI Bed at home.

SKIN CANCER

Hello, I am a Manager Level Distributor with HTE and I have been using the devices for 5 ½ years now. After a testimonial I made, many people have asked me for more details. I have several trainings as a naturopath and therapist. Healing of my eye: after only one month

Last July, I was playing tennis with three men and I got hit with the tennis ball in my left eye. I was seeing a black dot and like a hair in my eye. So I went to the optometrist urgently to examine my eye. After the examination, I was told that I had detachment of the retina and some other things without telling me. I asked the optometrist if there is anything that I can do to help my eye? He said NO, come see me again next month. I went back home and I immediately took stem cells, (something that I have used for 5 ½ years). I took 6 capsules daily. Moreover, I used the Power Eyes (15 minutes every night). After one month I went back to see my optometrist as requested. I did not say anything, I let her examine my eye again. She asked me: "Mrs Beaudoin, what did you do?" I said: "Why?" She said: "Well, I did not tell you but you had four hemorrhages in

your eye last month and now there is nothing". She asked me for some documentation. Pre-cancer (basal skin cancer: After a separation, I found myself with a (pre-cancer) basal appearance of a white pimple that did not heal.

My neighbour had the same thing a year before me. The surgeon wanted to make a hole of 1 inch below my nose. If you think about one centimeter under the nose, it's a big hole, so I refused the operation. My dermatologist was worried. I took the E-Power with the pen and I used it every day at the beginning and I used an oil that helped to regenerate. I went back to the dermatologist again. She examined the basal and she asked me to come back after two months to do the surgery and I still refused. I asked her if the basal has grown. She said no. So I said I will come back to check the basal again in two months. From experience, HTE devices are great. From my varied knowledge, I can say that when combined with other good products, the benefits amplify. For example, the E-Power amplifies the effect with the use of a mask, cream and vitamins. Thank you HTE for these wonderful machines.

**Louise Beaudoin, Manager Level Distributor
Drummondville, QC**

SKIN CANCER

I am very thankful to HTE for the changes that I am seeing in my client's health by using the Far Infrared equipment. I have been watching (skeptically) this equipment for about 5 years (yes I am a slower learner than Jeff Kowalski) and when we moved to a bigger

location I decided to investigate it seriously for my clients. I was really excited about what I experienced when my husband and I met with Carla Roethlisberger, to learn more about what HTE had to offer. We set up a room for the SOQI bed in our facility and made stations for the ERE and the E-power. We toss in the Power Eyes and Palm Massager for an extra experience. I tell my clients all the time that one size doesn't fit all as God made us all different. Well I stand corrected; this equipment meets people wherever you need the help. The clients that I can get to do the Go Greens are having amazing differences in their health due to the amount of potassium from food sources that are in this product.

This makes the liver gallbladder area very happy. I usually hear: "I can think clearer and have more energy!" I encourage my clients to do auto ship to get free shipping and sell some to their friends. I do not focus on the money aspects. God says in Proverbs 3:5-6 that he will take care of that. I have an awesome team of folks

under me that have the same philosophy and just want to help others that pushes me to experiment and learn more to help them to reach their goals.

Thank You Nancy Yoakum & Carla for the information you have been giving me to help me learn. Our group is planning to meet on a regular basis to learn off each other and to teach regular meetings together to share the testimonies with as many people that will listen. This equipment is the health care and preventative health care of the future in my opinion. I always tell people that taking care of your health is one of the best gifts you can give your family. I think the biggest testimony to date is the gentleman that was dealing with skin cancer that used all the equipment 3 days per week in our office and one day told me he noticed skin cells flaking off that were all dark on the back side so he put them under the microscope and thought 'hmm that looks like metal!' He used a magnet and the skin cells attached to them just as he suspected. We had a client recently that had a nodule on his vocal cords so we ran the AlleviAider over the vocal cords a handful of times and put him in the SOQI bed a couple of times and he went back to have the area scoped. The doctor scoped it twice because he could not believe it was gone. Praise The Lord! I am very excited about what my future is to be with HTE!

Manager Level Distributor
Cadillac, MI**

SKIN PROBLEMS

Do you sometimes scratch your head in bewilderment and wonder if the Chi Machine really works, or if the HotHouse is worth the money? Bob Nelson tells me that no one has ever spent more time speculating, researching and experimenting on the HTE

equipment than I did. Perhaps, like me, you will find it difficult to invest in expensive products. I am quite thrifty and it's important to be a good steward of family finances. If an item I'd like to buy is much over \$20, I'll usually walk away and think about it. If, after a day or two, I can't live without it, I'll go back and get it. If it's gone, it's gone. The good news is that I finally did purchase most of the HTE equipment, and it's been a win-win situation. If the equipment is routinely used as directed, you can't lose. It will yield results.

Initially, I began my journey into HTE while feeling very low on energy and dealing with slight skin lesions on my face. I attended a meeting at the SOQI Center and used the equipment. Linda Zeller let me borrow two HotHouses and a Chi Machine. I found that each time I relaxed under the Far Infrared (FIR) light therapy, it was like basking in an oasis of peace. Each session delivered me from feeling frazzled, overworked, and burdened. As Linda shared, "It's like being held in the arms of God".

How could anyone walk away from that? Well, how many "gimmicks for the gullible" have you been saddled with that end up in your closet or in a garage sale? It happens, and that is why I totally take my time. Eventually, I did discover that the Chi Machine, HotHouse, ERE, E-Power, and the SOQI Bed are in fact - the real deal. They deliver exactly what is described in the literature: Oxygen, circulation, detoxification, pain relief, injury repair, restoration, and

revitalization. They help restore health. Also, the equipment is well constructed and rarely requires repair. As for the low mood and skin issues, let me report that with regular use of this equipment, my moods are more stable, my skin is healthy and vital, and I feel better than at any time I can recall. However, there is a protocol to good health habits. I had to make other changes. For example, I now consume highly nutritious and organic food, and significantly reduced refined sugars and carbs - like bread. I refrain from all soda pop and caffeinated beverages, and regularly juice. With a little kick-boxing for exercise, Go Greens and progesterone cream, I have a good regimen for healthy living.

In addition, time for quiet reflection and spiritual reading are very important parts of my entire health protocol. Just as the clean, cool, fresh air that we breathe in fills the lungs with life, so time with Jesus can reduce strife. Clearly, much of life seems to be a roller coaster ride. Whether the ride is on the "Mad Mouse" or the "Kiddie Coaster", I'm always investigating ways to better manage the mental, emotional, and physical ups and downs. Programs like the 12-step meetings of AA, OA, Emotions Anonymous, and Alanon are a good source of spiritual grounding and problem solving.

I have three little books that help me. They are entitled: Quantum Faith, God's Creative Power will work for you, and God's creative power for healing. Quantum Faith is brilliant in its explanation of "things unseen", and how faith and physics are interrelated. These booklets help the intellectual "investigator" get closer to the truth. The more they are read and the scriptures recited, the better.

I hope you've enjoyed my testimony and that you are encouraged to invest in the HTE equipment. May the Lord bless and keep you in his most Merciful Heart!

Teri Graham
Manager Level Distributor
Roseville, MN

SKIN PROBLEMS

I have been a medical esthetician for the past 15 years; dealing with and treating many skin problems and skin malfunctions as well as aging skin from the outside in. I wanted to integrate the wellness approach to my skin regimen, as it

truly is the most effective way to regain balance for the skin. I came across the SOQI system and instantly knew how integral it would be in the overall anti aging process. Now I would be able to treat my client's skin issues from the outside in as well as the inside out! Integrating the

healing powers of the Far Infrared thermal energy during my facials has really made the facial treatments that much more effective. My Registered Massage Therapists have also incorporated the Far Infrared Thermal therapy as part of their regimen in treating their patients and our clients have commented on how much better they have been feeling. Thanks to HTE, not only am I able to offer a well rounded service menu integrating beauty, anti aging and wellness but I have been able to help my clients improve their overall well being at the same time.

Dina Martins, Supervisor Level Distributor
Woodbridge, Ontario

SLEEP DISORDERS

My friend Gail Ingwall, introduced me to the Chi Machine about four years ago. I remember watching a DVD about the machine and other HTE products. What stuck out in my mind from the DVD was that cancer cannot survive in a body that is properly oxygenated. That

struck me as basic information that everyone should know about. Although I did not purchase the machine or become a distributor, the information about a properly oxygenated body remained in the recesses of my mind. For the past few years, I've been sleeping an average of two to three hours per night. I would usually awake by 1:00 or 2:00 a.m., and my sleep was fragmented for the remainder of the time. I'd get out of bed at 6:00 a.m. not feeling rested and certainly not looking rested either. I developed bags and dark circles under my eyes. Needless to say my energy level was low, and I'd drag myself through the day.

I spoke to my doctor about this continuous lack of sufficient sleep, and he prescribed sleeping pills. I then sought alternative methods of dealing with this issue. I went to an herbalist, naturopath, and even to an acupuncturist. I was at my wit's end when I remembered Gail and the Chi Machine. I borrowed the machine from

Gail and the results were amazing. Within a period of just three weeks, the bags and dark circles disappeared, my energy level increased and most importantly, I went from sleeping 2 - 3 hours per night to 5 - 6 hours. I was elated and realized that this little machine works.

After my success with the Chi Machine, I signed on as a distributor. I felt that it was my duty to share this amazing product with as many people as possible. I told one of my friends who had been experiencing excruciating back pain for a year and a half, about the Chi Machine. He had attended a chiropractor, had done physiotherapy and even purchased and used a chair massager. He tried the Chi Machine and after 3 days, his pain decreased significantly enough that he was sold and signed on as a distributor.

I was promoted from distributor to supervisor in two months. My focus has been on helping others with their health issues and the business is growing on its own.

My approach to building a business is to share my results and my distributors' results. I am grateful to Gail for introducing the Chi Machine to me and to all my distributors who have allowed me to become a supervisor and a SOQI Club Winner. My intention is to work with all of you, so that you too can become supervisors.

Supervisor Level Distributor
Whitby, ON

SOQI BED

In late December 2008, my wife was invited to an evening presentation on medical devices of class II. During the evening she tried the machines and she was pleasantly surprised by the results and well-being at the first attempt. On returning home she told me about it with great enthusiasm. The next evening I tried it and I was excited too. After a few days we contacted Laura on how to order. Now, here we are with the SOQI Bed at home for our own use and family use. We started doing home parties to promote these devices. HTE devices are of high quality. They are really wonderful and we get great results too. It is important to educate people on the benefits of HTE devices. The Chi Machine has a place in every home ... For me I lend people a device. For example I let people rent the Chi Machine for 1 week to try and the results are good. This got me promoted to Manager level. I am happy to be part of HTE family. Thank you for your cooperation.

Jean Paul Emond,
Manager Level Distributor
Drummondville, Quebec

SOQI BED

My first experience with the Chi Machine and SOQI Bed was through my message therapist Joanne Crosson whom I have been going to since 2004. Joanne got me interested in them and I have to give her a big thank you.

These machines have helped my health issues immensely. I purchased the SOQI bed, Chi Machine, and many of the other medical devices in 2012. I got my neighbour interested after she had fallen and hurt her hip. After a week or so she started going on the Chi Machine. She liked it so much that when I would leave for work (a week at a time) she would take it home with her. Deb then purchased her own machine. Now she is waiting for the Bed to be set up so I am just doing the finishing touches to the room where it is going to be placed. I am planning on starting a home based business with my equipment which I will call the Calm Retreat. I look forward to building my business using these great machines, to fulfill my life long dream of helping other people. I would like to thank HTE for such great products. Thanks again.

Odessa, SK

SOQI BED

I am Dee Borgardt. I was a hurting, skeptical person sitting there on that September 11, 2009 day. A rather unreliable source had strongly encouraged me to come along with her to an HTE meeting. I had just taken my last oxycontin pill for the day and it was only noon. I

was sipping on an iced coffee, when Judith Bossenbroek shared her story about how the equipment had made a drastic improvement in her life. There were only six of us there. But I had enough doubt for 20 people.

During the meeting, someone with skin cancer and other issues was on the SOQI Bed. When she got off, she told us how she was planning to order a HotHouse to go with her Chi Machine. She felt so much better. Well I boldly stated that "I would never buy anything that I hadn't tried or researched." It took a while to get me onto the SOQI Bed and a little extra propping was needed. I used the Chi Machine for about 4 minutes about half way through the 30 minute session. Somewhere in that time I commented to Judith that she would have to come to my home to set this up for me. She was thinking of a more portable table system that she uses to demonstrate the equipment, when I was thinking SOQI Bed. The conversation became rather hilarious as we were talking about two different ideas at the same time. Then I corrected her to think my way! I also told her that I wanted to purchase one of everything in the store! I KNEW that this had completely stopped the PAIN I had ENDURED for the past six to seven years. This got my FULL attention!!!! We were all cautious that perhaps this was a reaction to the medicine, but I felt we were onto something here. She equipped me with a Chi Machine and a FIR Pad to go home with me while the SOQI Home Spa was ordered. Another friend lent me a HotHouse to put with that.

I was scheduled to go to the Mayo Clinic the next Tuesday, Sept. 15. I cancelled as soon as I returned home. When Jim returned from work that night he told me that he would take the vehicle in to have it serviced for the trip to Rochester. I said it wasn't necessary as I had cancelled the appointment already. He glared at me in disbelief!!!!!! He thought I had taken more medicine than I should have and that I was really talking funny. I assured him that I didn't need to see another Doctor as I had found something to take away the pain. The look of more disbelief came over his face as I explained what had happened that afternoon. I said that he would have to try this to believe it. Normally, Jim had to get me out and into bed each day for the last fifteen months. We had invested close to \$70,000 into my failing health. I had been seen and been diagnosed by doctors and specialists too many to count on two hands. Our own

current doctor had flat out yelled across the desk, "Dee, you are going to have to learn to live with this!!!!!!!" Jim replied, "She IS living with this and it is getting to the point of being unbearable!!!! That is when measures were taken to get Dee into the Mayo Clinic team. For the past months, I had spent about 12-16 hours sleeping and just barely getting up to eat and bathe. What could have brought out this huge change in my health. I had to let Jim experience this Equipment.

After he tired my little makeshift SOQI Bed Jim felt his aching back, feel much better. Still questioning if this would last thru the night and into the next day was the question. Was it good enough to warrant canceling that appointment? Well by Monday morning. I was planning ways to share this with my friends and family. I used our spare bedroom with a twin bed and the equipment. Cindy Sherr volunteered her HotHouse and Julie Wyman lent me her Advanced ERE to add to the Chi Machine and Fir Pad. I was equipped to help others find relief. I called several people and setup sessions for them to come and try the equipment. I let everyone have an hour session. I had everyone fill out a release form and also an Evaluation Form. At the last session, number five, I had them fill out another evaluation form. I then gave them info on the equipment, on renting it or coming for future sessions. I have serviced 219 clients to this date and I keep files with notes on each treatment.

During the course of the first week session, I even questioned how all this could take place and so fast!! During one of the sessions with my friend's mother, who was also a diabetic, I had left the room to get a drink of water. All of a sudden, I heard crying to turn down the ERE. On the previous two times she had not even felt a tingle when I turned up the ERE as far as it would go. She was so encouraged to be able to feel, as the doctor had told her that she was likely going to have the feet amputated. NOW, I was really focused knowing that others could be helped as drastically as I had been helped. That lady was Carol Rabe, and she is now a friend. Carol now owns her own SOQI Bed and has a future.

I had dealt with my Fibromyalgia, Diabetes, High Blood Pressure, Rheumatoid Arthritis, Osteo Arthritis and more. How could this pain disappear so rapidly? This equipment does do much to relieve pain!!!!!! I am now retired from a 32 year career working in a factory. I worked in pain and I took a lot of abuse to keep up with the men I worked with. I guess I am grateful that I was tested with my serious health challenges, as I am grateful to be a fast start, manager in 2 months and 15 days. I now can share this life changing equipment with a vast number of people from the convenience of my own home.
